- The right of data controllers and processors to process anyone's personal data
 - ✓ **The right of individuals to personal data protection**
 - ✓ **The right of individuals to private and family life**
 - The right of individuals to process any other individuals' personal data
16. Should data controllers and data processors be separate entities, the GDPR sets out that (up to 2 pts):
- data controllers are totally free to indicate one or more data processors, the latter not being bound by any obligation towards data controllers
 - ✓ **their relationships need to be regulated by specific contractual agreements or by different acts provided for by law**
 - their mutual relationships need to be regulated only by an order of any competent National Supervisory Authority
17. What is the difference between synthetic and anonymized data? (2 pts)
- Anonymized data are covered by the GDPR, whereas synthetic data are not
 - ✓ **Anonymized data lose most details and are therefore less useful to train algorithms**
 - Synthetic data are covered by the GDPR, whereas anonymized data are not
 - Only anonymization can be reversed to reidentify individuals
18. Why is the protection of personal data insufficient to protect fundamental rights? (2 pt)
- Because it only covers specific countries; there is no macroregional standardized regulation
 - ✓ **Internet users cannot cope with massive consent requests when they visit websites**
 - Because AI doesn't use personal data
 - Because AI can be biased
19. The E-Privacy Directive (up to 2 pts):
- provides for personal data protection in processing activities carried out by EU institutions
 - ✓ **needed to be implemented in any Member State**
 - was directly applicable in every Member State since its entry into force
 - ✓ **regulates personal data processing in connection with public communications services in public communications networks within the EU**
20. The European Electronic Communications Code (so-called Recast Directive) (up to 2 pts):
- deals with personal data processing activities in the communication industry

- ✓ aims at ensuring equal and fair access to electronic communications services, promoting at the same time connectivity across the EU
- ✓ does not concern personal data processing activities

21. What is the legal treatment of synthetic data? (2 pts)

- Synthetic data are protected by the GDPR.
- ✓ **Synthetic data are not covered by the GDPR.**
- Anonymized data are protected by the GDPR.
- Synthetic data are prohibited under the GDPR.
- Synthetic data and anonymized data are the same notion.

22. Why is the protection of personal data so important? (2 pt)

- Because the EU does not protect synthetic data
- ✓ **The protection of personal data usually serves to protect people from manipulation and exploitation**
- Because AI does not need personal data
- Because AI can be biased.

23. A Data Protection Impact Assessment under the GDPR is (2 pts):

- compulsory only when the appointment of a DPO is required by law
- ✓ **compulsory only in specific cases expressly set out by law**
- mandatory for any kind of processing activities involving non personal data
- compulsory for every kind of processing activities involving personal data

24. A data controller is (up to 2 pts):

- discretionally entitled to reject a data subject's request to access their personal data
- always required to grant access to a data subject's personal data by anyone requesting it
- ✓ **under an obligation to grant access to personal data concerning a specific data subject requesting it, unless otherwise set out by law**
- ✓ **required to grant access to personal data to subjects other than the data subject, when set forth by law**
- required to grant access to personal data only when data subjects submitted a related request also to the data processor

25. The AI Act is (up to 2 pts):

- A soft law legal instrument offering guidelines for using AI
- ✓ **A hard law regulation adopted by the EU**
- An international convention governing the use of AI worldwide

- An act adopted by the EU which third countries will be obliged to adopt
 - ✓ **A regulation adopted by the EU which might influence extra-EU countries in adopting similar legislation**
26. The Brussels Effect means that (2 pts):
- All economic operators coming from outside the EU are bound to comply with EU law
 - Many third countries will be legally required to adopt the same legislations adopted by Belgium
 - ✓ **Some extra-EU legal systems adopted, or will likely adopt, legislations similar to those firstly adopted by the EU**
 - Some third countries will conclude international conventions with the EU for applying EU legislation
27. Which of the following statements is false? (up to 2 pts)
- ✓ **The GDPR applies only to EU citizens within the EU**
 - The GDPR applies to any data subject within the EU
 - The GDPR applies to data controllers incorporated in third countries when they operate in the EU
 - ✓ **The GDPR does not apply to data controllers incorporated in third countries when they process personal data belonging to EU citizens**
28. The 2014 judgment issued by the European Court of Justice in case *Google Spain* (C-131/12) (up to 2 pts):
- paved the way to recognize the right to personal data protection in the EU Charter of Fundamental Rights
 - ✓ **paved the way to include the right to be forgotten in the GDPR as one of the rights recognized to the data subject's benefit**
 - ✓ **originated from a preliminary ruling proceedings referred to the ECJ by a Spanish court**
 - paved the way to include the right to be forgotten in the GDPR as one of the rights recognized to the data controller's benefit
29. Which is the correct order of the following sources of EU law in the EU related hierarchy (from the top to the bottom)? (2 pts)
- Regulations/Directives, International Agreements, Charter of Fundamental Rights, Decisions
 - Founding Treaties/Charter of Fundamental Rights, Regulations/Directives
